Art Unit: 2643

#### **DETAILED ACTION**

### Response to Amendment

1. This Office action is in response to amendment filed 10/14/2003 (paper no. 19).

#### Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1-2, the claim language with the phrases "any" and "may be" render the claims vague and indefinite because those phrases have alternate meanings, which do not positively identify the claimed limitation.

## Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 2643

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Toyoda et al. (US PAT. 6,229,884 hereinafter Toyoda).

Regarding claim 1, Toyoda discloses a method for an electronic mail system to route at least one document sheet to at least one recipient at shown in figure 8 (col. 2 line 1-5) comprising the steps of dividing the at least one facsimile page into blocks such that the at least one document sheet contains facsimile information as well as information of destination in a predetermined zone of the document sheet (col. 9 lines 8-14), converting the at least one document sheet into data (col. 9 lines 24-27), isolating at least one of the blocks as a recipient block such that the predetermined zone of the at least one document sheet indicates e-mail destination (col. 9 lines 10-12), locating the address of the at least one recipient by analyzing the recipient block and analyzing address data to determine an address corresponding to the at least one recipient (col. 9 lines 29-37), and transmitting the at least one document sheet to the at least one recipient at the located address (col. 9 line 61 through col. 10 line 2).

6. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Alam (US PAT. 6,104,500 hereinafter Alam).

Art Unit: 2643

Regarding claim 1, Alam discloses a method for routing at least one document sheet to at least one recipient comprising the steps of dividing the at least one facsimile page into blocks as shown in figure 4 (col. 7 lines 52-57), converting the at least one document sheet into data (col. 7 lines 42-43), isolating at least one of the blocks as a recipient block such that it differentiates between areas of the at least one facsimile page that are unlikely to contain an addressee's name and areas that are likely to contain the name (col. 8 lines 19-25), locating the address of the at least one recipient by analyzing the recipient block (col. 7 line 58) and analyzing address data to determine an address corresponding to the at least one recipient (col. 9 lines 30-59), and transmitting the at least one document sheet to the at least one recipient at the located address (col. 10 lines 35-36).

Regarding claim 2, Alam discloses a system for routing at least one facsimile page (52) as shown in figure 4 to at least one recipient comprising a fax server (20) as shown in figure 1 including a storage unit (i.e., RAM) for storing data and computer programs (col. 7 lines 5-9), wherein one of the computer programs automatically polls a complete list of all possible addressees thereby keeping the fax server an address database (col. 9 lines 39-42), a data processor (34) including a fax-analysis-engine computer program (46), to divide the at least one facsimile page in to blocks (col. 7 lines 52-57), to convert the at least one facsimile page into data (col. 7 lines 42-43), to isolate at least one of the blocks as a recipient block such that it differentiates between areas of the at least one facsimile page that are unlikely to contain an addressee's name and areas that are likely to contain the name (col. 8 lines 19-25), to locate the address of the at least one recipient by analyzing the recipient block (col. 7 line 58) and to analyze the address database to determine an address corresponding to the at least one recipient

Art Unit: 2643

(col. 9 lines 30-59), and a fax-router computer program (44) for automatically routing the facsimile page data to the at least one recipient at the located address such that the fax-router computer program is in operable with a transmitter for sending the facsimile page data to the addresses (col. 10 lines 35-36).

#### Response to Arguments

7. Applicant's arguments filed 3/19/2003 (paper no. 15) have been fully considered but they are not persuasive.

In response to applicant's argument that Toyota discloses that destination information is provided in a predetermined zone of the document sheet rather than in any portion of the facsimile page, it appears that the term "any" can be interpreted as any quantity or part, i.e., one or some, according to Webster's II New Riverside University Dictionary. Note while Toyota clearly teaches that the recipient block is located in a predetermined portion of the at least one facsimile page (col. 9 lines 8-14), wherein the predetermined portion is being considered as part of any portion and at least one facsimile page is being considered as part of any page. In addition, the claimed language fails to explicitly define the recipient block. Thus, the broad claimed limitations are met by Toyota.

In response to applicant's argument that Alam discloses that analysis of the image of the fax is performed only on the fax cover page rather than in any page of the facsimile, it appears that the term "any" can be interpreted as any quantity or part, i.e., one or some, according to Webster's II New Riverside University Dictionary. Note while Alam clearly teaches to analyze the image of the fax in those areas of the fax cover page (col. 8 lines 19-22 and col. 10 lines 43-

Page 6

· Application/Control Number: 09/479,997

Art Unit: 2643

48), wherein the fax cover page is being considered as part of any page of the facsimile. In

addition, the claimed language fails to explicitly define the recipient block. Thus, the broad

claimed limitations are met by Alam.

Conclusion

8. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time

policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing

date of this final action.

9. Any response to this final action should be mailed to:

**BOX AF** 

Commissioner of Patents and Trademarks

Washington, D.C. 20231

Or faxed to:

Art Unit: 2643

(703) 872-9314 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal

Page 7

Drive, Arlington, VA, Sixth Floor (Receptionist).

10. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to George Eng whose telephone number is 703-308-9555. The

examiner can normally be reached on (703) 308-9555 from Tuesday to Friday 7:30 a.m. - 6:00

p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Curtis A. Kuntz, can be reached on (703) 305-4708.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 306-0377.

George Eng
